Croce, M.D. From the Department of Molecular Virology, Immunology, and Medical Genetics Sun, 11 Mar 2018 15:31:00 GMT molecular origins of cancer Oncogenes and Cancer - The development of resistance to platinum-based chemotherapy is a major clinical challenge in cancer treatment, since the cellular response which confers resistance to carboplatin is multifactorial and poorly understood (Wernyj, Morin, 2004; Shahzad, Berestein, Sood, 2009). It has been observed that the intracellular mechanisms by which cells become resistant to carboplatin include increased ... There are two types: nucleotide excision repair and base excision repair Fri, 16 Mar 2018 10:24:00 GMT DNA repair - Wikipedia - Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors, which do not spread to other parts of the body. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss, and a change in bowel movements. While these symptoms may indicate cancer, they ... Wed, 14 Mar 2018 03:31:00 GMT Molecular Pharmaceutics (ACS Publications) - Among the most important challenges in biomedicine is to understand the role of chromatin and epigenetics in human health and disease. During last 15 years, epigenetics has consolidated as a new multi-disciplinary field on its own with an enormous scientific and therapeutic potential for cancer and many other relevant human pathologies such as cardiovascular diseases, aging, neurodegenerative ...
